Volume 13, Number 2

ACM Journal on

Emerging Technologies in Computing Systems

Special Issue on Nanoelectronic Circuit and System Design Methods for the Mobile Computing Era

Article 12 (2 pages) Guest Editorial
A. Todri-Sanial, S. P. Mohanty, M. Comte, and M. Belleville

Article 13 (21 pages) Exploiting Idle Hardware to Provide Low Overhead Fault Tolerance for VLIW Processors
A. L. Sartor, A. F. Lorenzon, L. Carro, F. Kastensmidt, S. Wong, and A. C. S. Beck

Article 14 (20 pages) A Simplified Phase Model for Simulation of Oscillator-Based Computing Systems
Y. Fang, V. V. Yashin, B. B. Jennings, D. M. Chiarulli, and S. P. Levitan

Article 15 (23 pages) A Fine-Grain, Uniform, Energy-Efficient Delay Element for 2-Phase Bundled-Data Circuits
A. Singhvi, M. T. Moreira, R. N. Tadros, N. L. V. Calazans, and P. A. Beerel

Article 16 (13 pages) A Fault-Tolerant Ripple-Carry Adder with Controllable-Polarity Transistors
H. Ghasemzadeh Mohammadi, P.-E. Gaillardon, J. Zhang, G. De Micheli, E. Sanchez, and M. Sonza Reorda

continued on back cover

Association for Computing Machinery

Advancing Computing as a Science & Profession

Article 17 (23 pages) Non-Volatile Processor Based on MRAM for Ultra-Low-Power IoT Devices
S. Senni, L. Torres, G. Sassatelli, and A. Gamatie

Article 18 (28 pages) Monolayer Transistor SRAMs: Toward Low-Power, Denser Memory Systems
J. Rakshit, K. Mohanram, R. Wan, K. T. Lam, and J. Guo

Regular Papers

Article 19 (24 pages) Alleviate Chip Pin Constraint for Multicore Processor by On/Off-Chip Power Delivery System Codesign
X. Wang, J. Xu, Z. Wang, H. Li, Z. Wang, P. Yang, L. H. K. Duong, R. K. V. Maeda, and Z. Wang

Article 20 (20 pages) Yield, Area, and Energy Optimization in STT-MRAMs Using Failure-Aware ECC
Z. Pajouhi, X. Fong, A. Raghunathan, and K. Roy

Article 21 (22 pages) Optimized Standard Cells for All-Spin Logic
M. G. Mankalale and S. S. Sapatnekar

Article 22 (18 pages) System-Level Design to Detect Fault Injection Attacks on Embedded Real-Time Applications
W. Jiang, L. Wen, K. Jiang, X. Zhang, X. Pan, and K. Zhou

Article 23 (22 pages) Asymmetric Underlapped FinFETs for Near- and Super-Threshold Logic at Sub-10nm Technology Nodes
A. A. Goud, R. Venkatesan, A. Raghunathan, and K. Roy

Article 24 (25 pages) Electro-Photonic NoC Designs for Kilocore Systems
J. L. Abellán, C. Chen, and A. Joshi

Article 25 (18 pages) One-Step Sneak-Path Free Read Scheme for Resistive Crossbar Memory
Y. Wang, L. Rong, H. Wang, and G. Wen

Article 26 (25 pages) Ultra-low-leakage, Robust FinFET SRAM Design Using Multiparameter Asymmetric FinFETs
A. Guler and N. K. Jha

Article 27 (17 pages) Shielding STT-RAM Based Register Files on GPUs against Read Disturbance
H. Zhang, X. Chen, N. Xiao, L. Wang, F. Liu, W. Chen, and Z. Chen

Article 28 (31 pages) Source Authentication Techniques for Network-on-Chip Router Configuration Packets
A. K. Biswas

Article 29 (25 pages) A Survey of Techniques for Architecting Processor Components Using Domain-Wall Memory
S. Mittal
