"Benefits of Domestic Travel among Bachelor of Science in Tourism Students" Unpublished research study, John B. Lacson Colleges Foundation-Molo Inc. Iloilo City, October, 2006.

Abstract

This research study determined the benefits of domestic travel among Bachelor of Science in Tourism students at John B. Lacson Colleges Foundation-Molo Inc. Molo, Iloilo City for S.Y. 2006-2007. The participants of this study were the eighty six (86) Bachelor of Science in Tourism students of the Business Department. This study used the population method to determine the participants of the study. The researcher-made instrument entitled "Benefit of Domestic Travel Rating Scale" was used by the researchers to gather data needed for this study. Descriptive statistics used were the frequency count, percentage, and mean. Results revealed that the benefit of

domestic travel among tourism students was "very beneficial" as an entire group and when grouped according to year level, and socio-economic status. The same results were also exhibited by the tourism students when grouped according to different categories in terms of personal, educational, social and cultural.
