Abstract

The purpose of this study was to determine the benefits of seamanship among marine engineering students of John B. Lacson Foundation Maritime University-Molo, Iloilo City. The data of this descriptive research were gathered using the data-gathering instrument entitled "Benefits of Seamanship Rating Scale" designed by the researchers. The respondents of this study were the 140 randomly selected marine engineering students who enrolled at the John B. Lacson Foundation Maritime University-Molo, Iloilo City, Philippines for school year 2010-2011. Descriptive

statistics employed were the mean, frequency count, percentage, and rank. No inferential statistics used in this study. The findings revealed that the most prevalent benefits in seamanship perceived by the marine engineering students are the following: "seamanship can give a lot of opportunity to seafarers to travel and see different places around the world", "seamanship provides seafarers exposure to different culture", "seamanship enables seafarers and their members of family to eat costly food at prestigious restaurants", "seamanship can let seafarers enjoy luxurious items, like cellular phone, telephone, car, etc.", "seamanship is an opportunity for the seafarers to build businesses to provide jobs for other people", "seamanship allows seafarers to contribute to the country's economic growth", "seamanship could provide seafarers the ample funds for family travel".
