Preface ..... iii

Chapter

1

## Introduction

1.1	Origin and Development of Statistics.....	2
1.2	Definition.....	3
1.3	Uses of Statistics .....	3
1.4	Fields of Statistics.....	4
1.5	Constants and Variables .....	4
1.6	Data and Information.....	5
1.6.1	Sources of Data.....	6
1.6.2	Scales of Measuring Data.....	6
1.6.3	Methods of Collecting Data: Its Advantages and Disadvantages.....	7
1.7	Population and Sample.....	9
1.7.1	Sloven's Formula in Determining the Sample Size .....	9
1.8	Census and Sampling Techniques.....	10
1.8.1	Random and Non-random Sampling.....	11
1.8.2	Properties of Random Sampling.....	11
1.8.3	Two Kinds of Random Sampling .....	11
1.8.4	Sampling Techniques .....	11
Exercise 1.1	.....	15
Exercise 1.2	.....	17

**Organization and Presentation of Data**

2.1	Forms of Presentation of Data.....	20
2.2	Different Kinds of Graphs/Charts.....	21
2.3	Computer Applications: Constructing Charts.....	29
	Exercise 2.1.....	35

**Frequency Distribution**

3.1	Definition.....	40
3.2	Parts of Frequency Table.....	40
3.3	Steps in Constructing a Frequency Distribution Table.....	41
3.4	Cumulative Frequency Distribution.....	43
3.5	Relative Frequency Distribution.....	43
3.6	Graphical Representation of the Frequency Distribution.....	44
3.7	Computer Application: Constructing a Frequency Distribution Table.....	48
	Exercise 3.1.....	51

**Measures of Central Tendency**

4.1	Summation Notation.....	56
	4.1.1 Rules for the Summation Symbol.....	57
	Exercise 4.1.....	59
4.2	The Arithmetic Mean.....	61
	4.2.1 Characteristics of the Mean.....	61
	4.2.2 Uses of the Mean.....	61
	4.2.3 Computation of the Mean for Ungrouped Data.....	62
	4.2.4 Weighted Arithmetic Mean.....	63
	4.2.5 Computing the Mean for Grouped Data.....	65

4.3	The Median.....	68
4.3.1	Characteristics of the Median.....	68
4.3.2	Uses of the Median.....	69
4.3.3	Computation of the Median for Ungrouped Data.....	69
4.3.4	Computation of the Median for Grouped Data.....	70
4.4	The Mode .....	71
4.4.1	Characteristics of the Mode.....	71
4.4.2	Uses of the Mode .....	72
4.4.3	Computation of the Mode for Ungrouped Data.....	72
4.4.4	Computation of the Mode for Grouped Data .....	72
4.5	The Quantiles .....	74
4.5.1	Computation of Quantiles for Ungrouped Data.....	74
4.5.2	Computation of Quantiles for Grouped Data .....	77
4.6	Microsoft Excel Application.....	79
4.6.1	Using Excel for Average, Median, and Mode .....	80
4.6.2	Using Excel for Quartiles and Percentiles.....	82
4.6.3	Using Excel for Standard Deviation.....	84
4.7	Solutions/Excel Formulas for Grouped Data.....	87
	Exercise 4.2.....	91

5.1	Introduction .....	102
5.2	Measures of Variability .....	102
5.2.1	The Range.....	103
5.2.2	The Average Deviation.....	104
5.2.3	The Quartile Deviation.....	108

5.2.4	The Standard Deviation .....	113
5.3	Skewness and Kurtosis .....	125
5.3.1	Calculating Skewness and Kurtosis .....	126
5.3.2	How Skewness is Computed.....	127
5.3.3	Interpreting Skewness.....	128
5.4	Kurtosis.....	128
5.5	Standard Scores of z-scores.....	128
5.6	Coefficient of Variation .....	130
5.7	Excel Applications of Measures of Variability.....	131
	Exercise 5.1 .....	137
	Exercise 5.2.....	147
	Exercise 5.3.....	151
	Exercise 5.4.....	153

**Chapter**

**6**

**Principles of Counting and Theories of Probability**

6.1	The Fundamental Counting Principle .....	156
6.2	The Counting Principle for Alternative Cases.....	159
6.3	Factorial (n!).....	160
6.4	Permutation.....	160
6.5	Combination .....	163
	Exercise 6.1 .....	167
6.6	Probability.....	179
6.6.1	Three Types of Probability.....	179
6.6.2	Sample Spaces and Events.....	181
6.6.3	Operations with Events.....	183
6.6.4	Some Rules of Probability.....	187
6.6.5	The Additive Rules .....	187
6.6.6	Conditional Probability .....	190
6.6.7	The Multiplication Rules.....	192
	Exercise 6.2 .....	195

6.7	Random Variables.....	203
6.7.1	Types of Random Variables.....	203
6.7.2	Computing Probabilities: The Discrete Case.....	204
6.8	Mathematical Expectation (ME) or Expected Value (EV) .....	206
	Exercise 6.3.....	209

**Chapter**

**7**

**Normal, Binomial and Poisson Distributions**

7.1	Discrete and Continuous Variables.....	214
7.2	Probability Distribution .....	214
	Exercise 7.1.....	217
7.3	The Binomial Distribution.....	219
7.3.1	Characteristics of a Binomial Distribution.....	219
7.3.2	Mean, Variance, and Standard Deviation for a Binomial Probability Distribution.....	221
	Exercise 7.2.....	223
7.4	Poisson Probability Distribution.....	229
7.4.1	The Mean, Variance, and Standard Deviation of a Poisson Probability Distribution.....	232
	Exercise 7.3 .....	235
7.5	The Normal Distribution.....	239
7.5.1	The Standardized Normal Curve .....	241
7.6	Standardized Normal Distribution.....	241
7.7	Application of the Areas Under a Normal Curve .....	244
	Exercise 7.4.....	249

**Chapter**

**8**

**Hypothesis Testing**

8.1	Introduction .....	254
-----	--------------------	-----

8.2	Definition of Hypothesis .....	254
8.3	Definition of Hypothesis Testing.....	255
8.4	Two Types of Hypothesis .....	255
8.5	Types of Errors.....	256
8.5.1	Definition of Type I and Type II Errors.....	256
8.6	Definition of Level of Significance.....	257
8.7	One-tailed and Two-tailed Tests.....	257
8.8	Some Terminologies To Remember.....	260
8.9	A Hypothesis Testing Procedure .....	260
8.9.1	Chi-square Goodness-of-fit Test: Equal Expected Frequencies.....	274
8.9.2	Contingency Table Analysis.....	276
	Exercise 8.1.....	279

Chapter

9

### Measures of Correlation

9.1	Definition.....	292
9.2	Scatterpoint Diagram.....	292
9.3	The Pearson Product-Moment Correlation Coefficient .....	293
9.4	Other Interpretation of Pearson's $r$ .....	296
9.4.1	Coefficient of Determination .....	296
9.4.2	Testing the Significance $r$ .....	297
9.5	An Alternate Formula for $r$ .....	298
	Exercise 9.1.....	299
	Exercise 9.2.....	303

### Appendix

Table A	Proportions of Area Under the Standards Normal Curve .....	306
Table B	Critical Values of $t$ .....	308

Table C	Critical Values of the Pearson Product-Moment Correlation Coefficient, $r$ .....	309
Table D	Critical Values of Chi-Square, $\chi^2$ .....	310
Table E	Critical Values for the Spearman, Rank-Order Correlation Coefficient, $r$ .....	311
<b>References</b>	.....	<b>313</b>
<b>Index</b>	.....	<b>315</b>

# Index

## A

- Analysis of variance, 4
- Arithmetic mean, 61
- Average deviation, 103, 104
- Averages, 56

## B

- Babylon, 2
- Babylonian government, 2
- Bar graph, 22, 23
- Biblical times, 2
- Binomial distribution, 219, 231
  - characteristics of a, 219
- Business, 2

## C

- Cartogram, 27
- Census, 10
- Charts, 21
  - constructing, 29
  - steps, 30
- Chebyshev's theorem, 123
- Chi-square goodness-fit-test, 274
- Circle graph, 25
- Coefficient of variation, 130
  - disadvantages of the, 130
- Combination, 163
- Computer applications, 29, 48
  - constructing a frequency distribution table, 48
- Conditional probability, 190
- Constants, 4
- Consumers, 2
- Contingency table analysis, 276
- Continuous random variables, 214
- Correlation, 292
- Counting principle, 156
  - the fundamental, 156
- Counting techniques, 156
- Critical value, 260
- Cumulative frequency, 45
- Cumulative frequency distribution, 43

## D

- Data, 5

- forms of presentation of, 20
  - graphical presentation, 20
  - tabular, 20
  - textual, 20
- its advantages and disadvantages, 7
- methods of collecting, 7
  - direct or interview method, 7
  - experimentation, 7
  - indirect or quantitative method, 7
  - observation method, 7
  - registration method, 7
- sources of, 6
  - primary source, 6
  - secondary source, 6

## Deciles, 74

## Demographics, 4

## Descriptive statistics, 4

- concerned with the methods of, 4
  - collecting, 4
  - organizing, 4
  - presenting data, 4

## Determination, 296

- coefficient of, 296

## Dichotomous, 5

## Discrete

- case, 204
  - computing probabilities, 204
- random variable, 214
- variables, 5

## E

- Egypt, 2
- Element, 181
- Employment, 2
- Equal expected frequencies, 274
- Errors, 256
  - types of, 256
- Estimation, 4
  - alpha, 4
  - confidence interval, 4
  - test of significance, 4
- Events, 182
  - compound event, 182
  - operation with 182, 183
    - compliment of an event, 186

- intersection of events, 184
  - union of events, 183
- simple event, 182
- Excel, 79
  - exercises, 80
  - formulas, 87
    - for grouped data, 87, 132
  - using for, 80
    - average, 80
    - median, 80, 82
    - mode, 80, 82
  - using, 79
    - for quartiles and percentiles, 82
    - for standard deviation, 84
- Expected value (EV), 206
- Experiment, 181
- F**
- Factorial ( $n!$ ), 160
- Fisher, Sir Ronald Aylmer, 3
- Formula for  $r$ , 298
  - an alternative, 298
- Frequency distribution, 40
  - definition, 40
  - graphical representation of the, 44
  - steps in constructing a, 41
  - table, 41
- Frequency polygon, 45
- Frequency table, 40
  - parts of, 40
    - class boundaries, 41
    - class limits, 40
    - class marks, 41
    - class size, 41
- G**
- Gauss, Karl Friedrich, 3
- Gender, 5
- Graphs, 21
  - bar graph, 21
  - circle graph, 21
  - line graph, 21
- H**
- Hypothesis, 254, 255
  - about means, 261
  - definition of, 254
  - testing, 4, 265
    - about a single proportion, 265
    - about two proportions, 266
- Chi-square test, 4
  - definition of, 255
  - four possible outcomes for a, 256
- F-test, 4
  - procedure, 260
- t-test, 4
  - z-test, 4
- types of, 255
  - alternative hypothesis, 255
  - null hypothesis, 255
- I-K**
- Inferential statistics, 4
  - tools under this field, 4
    - estimation, 4
    - hypothesis testing, 4
    - normal distribution, 4
    - probability distribution, 4
    - sampling distribution, 4
- Inflation rates, 2
- Information, 5
- Innovations, 2
- Inter-quartile range, 111
  - characteristics of the, 112
- Kurtosis, 125, 128
  - calculating, 126
- M**
- Map graph, 27
- Mean(s), 61, 221
  - characteristics of the, 61
  - computation of the, 62
    - for grouped data, 65
    - for ungrouped data, 62
  - difference between, 264, 270
  - two methods, 65
    - coded method, 65, 67
    - long method, 65, 66
  - uses of the, 61
- Mean absolute deviation, 105
  - characteristics of the, 108
  - of grouped data, 106
  - of ungrouped data, 105
- Measures of central tendency, 56, 102
- Measures of correlation, 292
- Measures of variability, 102, 103, 131
  - excel application of, 131
- Median, 68

- characteristics of the, 68
- computation of the, 69
  - for grouped data, 70
  - for ungrouped data, 69
- Microsoft application, 79
- Mode, 71
  - bimodal, 71
  - characteristics of the, 71
  - computation of the, 72
    - for grouped data, 72
    - for ungrouped data, 72
  - modal class, 71
  - unimodal, 71
  - uses of the, 72
- Multinomial variables, 5
- Multiplication rules, 192
  
- N-O**
- Non-random sampling, 11
- Non-rejection region, 260
- Normal curve, 244
  - application of the areas under a, 244
- Normal distribution, 4, 239
  - area under the curve, 4
- One-tailed test, 257, 258
  
- P**
- Pearson, Karl, 3
- Pearson product-moment correlation coefficient, 293
- Pearson's  $r$ , 296
  - other interpretation of, 296
- Percentiles, 74
- Permutation, 160
- Pictogram, 21
- Pictograph, 26
- Picture graph, 21
- Pie chart, 21, 25
- Poisson distribution, 229
- Poisson probability distribution, 231
  - the mean, variance, and standard deviation of a, 232
- Poisson random distribution, 231
- Population, 9
- Probability, 179
  - basic properties of, 187
  - distribution, 4, 214, 229
    - Bernoulli, 4
    - binomial, 4
    - geometric, 4
    - hypergeometric, 4
    - posteriori, 4
    - priori, 4
  - function, 204
  - histogram, 206
  - some rules of, 187
  - the additive rules, 187
  - three types of, 179
    - classical probability, 179
    - relative frequency of occurrence, 180
    - subjective probabilities, 180
- Promotion, 2
- Psychology, 3
  
- Q**
- Qualitative
  - data, 5
  - values, 5
- Quantiles, 74
  - computation of, 77
    - for grouped data, 77
- Quantitative variables, 5
- Quartile deviation, 108
  - of ungrouped data, 109
  - of grouped data, 111
  - characteristics of the, 112
- Quartiles, 74
  - computation of, 74
    - for ungrouped data, 74
- Questionnaire, 6
  
- R**
- Random sampling, 11
  - kinds of, 11
    - restricted random sampling, 11
    - unrestricted random sampling, 11
  - properties of, 11
    - equiprobability, 11
    - independence, 11
- Random variable, 203, 204, 214
  - mathematical expectation (ME), 206
  - types of, 203
    - continuous random variable, 203
    - discrete random variable, 203
- Range, 103
  - other characteristics of the, 104
- Rejection region, 260
- Relationship or correlation, 292

- between two variables, 292
- three degrees of, 292
  - n, 292
  - perfect correlation (positive and negative), 292
  - some degrees of correlation (positive and negative), 292
- Relative frequency distribution, 43
- Roster method, 181
- S**
- Sample mean, 264
  - and population mean, 268
  - comparing, 268
- Sample size, 4, 9
- Sample space, 181
- Sampler, Soritec, 3
- Sampling distribution, 4
- Sampling techniques, 10, 11
  - convenience sampling, 14
  - incidental sampling, 14
  - judgment or purposive sampling, 14
  - multi-stage or multiple sampling, 13
  - non-random sampling techniques, 14
  - quota sampling, 14
  - cluster sampling, 14
  - random sampling techniques lottery or fishbowl sampling, 11
  - sampling with the use of table of random numbers, 12
  - stratified random sampling, 12
  - systematic sampling, 12
- Scales of measurement, 6
  - interval scale, 6
  - nominal scale, 6
  - ordinal scale, 6
  - ratio scale, 6
- Scatter point diagram, 21
- Scattergram, 28
- Scatterpoint diagram, 292
- Significance level, 257
  - definition of, 257
- Significance of  $r$ , 297
  - testing the, 297
- Skewed distributions, 125
- Skewness, 125
  - calculating, 126
  - how is computed, 127
- Sloven's formula, 9
  - in determining the sample size, 9
- Standard deviation, 103
  - advantages of the, 121
  - and the variance, 120
  - application of the, 122
  - characteristics of the, 120
  - for a binomial probability distribution, 221
  - interpreting the, 123
  - of grouped data, 117
  - of ungrouped data, 113
- Standard normal curve, 241
- Standard normal distribution, 241
- Standard notation, 56
  - rules for the, 57
  - summation symbol, 57
- Standard scores, 4, 128
- Statistics, 2
  - definition, 3
  - development of, 2
  - fields of, 4
  - methods in, 2
    - analysis, 2
    - collections, 2
    - interpretation of data, 2
    - organization, 2
    - presentation, 2
  - origin of, 2
  - uses of, 3
- Summation notation, 56
- Symbols, 9
  - for parameter, 9
  - for statistics, 9
- T**
- Tabular form, 22, 24
- Tabular presentation, 20
  - advantages of, 20
- Tan, Michael, 56
- t-distribution, 268
- Test concerning means, 268
- Test statistics, 260
- Two-tailed test, 258
- V-Z**
- Values, 4
  - classified as, 4
    - qualitative (categorical), 4
    - quantitative (numerical), 4
  - the set of, 4
- Variability, 102

- 
- measured in terms of, 102
    - mean, 102
    - mean deviation, 102
    - range, 102
    - standard deviation, 102
    - variance, 102
  - Variables, 4, 5
    - and data, 8
      - classifications of, 8
      - cause and effect relationships, 5
      - independent/endogenous variables, 5
      - dependent/exogenous variables, 5
  - Variance 103, 113, 221
    - of grouped data, 117
    - of ungrouped data, 113
  - Variation, 102
  - Weighted arithmetic mean, 63
  - z-scores, 128
