The Thank-You's xv

About the Author xvii

Part I: The Preliminaries

Chapter 1: From Research Topic to Research Question 1

Doing Social Science 3
Research Questions and This Course's Research Project 3
From Research Topic to Research Question 5
Crafting a Research Question 6
Finding and Refining a Research Question 9
Where Do Research Questions Come From? 9
How to Phrase a Research Question 12
Writing Your Paper 18
Summary 19
Key Terms 19

Chapter 2: From Research Question to Theory to Hypothesis 21

What Is a Theory? 22
The Parts of a Theory 23
Where Theories Come From 25
From Question to Theory 28
Tools for Developing Your Theory 31
Parsing a Theory: The Causal Mechanism 36
Specifying Assumptions and Scope Conditions 41
From Theory to Hypothesis 44
The Parts of a Hypothesis 44
Hypotheses and Evidence 46
Concepts, Indicators, and Validity 48
Writing Your Theory Section 51
Summary 53
Key Terms 54

Part II: The Practicalities

Chapter 3: Doing Pre-research 55

The Parts of an Empirical Paper 55
How to Think About Literature(s) 56
What a Literature Review Is Not 57
How to Find Literature(s) 58
How to Organize Literature(s) 63
Managing the Reading and Information 63
Managing the Reference List 65
How to Write the Literature Review 68
Strategies for Finding an Organizational Structure 69
Organizing a Literature 71
Actually Writing the [********] Thing 72
Summary 80
Key Terms 80

Chapter 4: Choosing a Design That Fits Your Question 81

Types of Hypotheses 82
Four Probabilistic Hypothesis Types 82
Two Deterministic Hypothesis Types 89
What Type of Analysis Should I Conduct? 95
Similarities and Differences in Qualitative and Quantitative Methods 95
Strengths and Weaknesses of Qualitative and Quantitative Methods 97
Overview of Techniques 100
Major Forms of Quantitative Analysis 100
Major Forms of Qualitative Analysis 104
Summary 108
Key Terms 108

Chapter 5: Case Selection and Study Design for Qualitative Research 109

Qualitative Study Design 110
How Many Cases Should I Study? 110
Which Cases Should I Study? 112
A Note on Background Research 115
Hypothesis-Testing Techniques and Case Selection 116
Content Analysis 118
Analytic Narratives 122
Case Control/Controlled Comparison Method 124
Structured Focused Comparison 129
Process Tracing 130

Writing Your Methodology Section 132
Summary 134
Key Terms 134

Chapter 6: Qualitative Data Collection and Management 135

Information, Data, and Evidence 135
Information versus Data 136
Measurement 137
Maximizing Leverage Over Your Hypotheses 139
Kinds of Qualitative Data Sources 140
Data and Counterfactuals 141
Data Collection Techniques 144
Research From Sources 144
Human Subjects Research 148
Sources and Resources 152
Data Management Options 153
Writing About Data Collection 155
Summary 156
Key Terms 156

Chapter 7: Quantitative Data Collection and Management 157

Identifying Data Needs: What Cases? 157
Units of Analysis 158
Populations and Samples 161
Identifying Data Needs: What Variables? 162
Control Variables 162
Multiple Indicators and Robustness Checks 167
Measurement: Matching Concepts to Indicators 168
Operationalization: Validity 168
Matching Concepts and Indicators 170
Measurement: Reliability 170
Getting Ready-to-Use Data 171
Replication Datasets 172
Data Archives 174
Citing Datasets 174
Collecting and Managing Your Own Data 175
A Brief Discussion of Coding 177
Summary 179
Key Terms 179

Chapter 8: Preparing Quantitative Data for Analysis 181

Transferring Data into Your Stats Program 181
Getting Started 182
Dealing With Missing Data 183

Variables, Variable Names, and Variable Labels 184
Entering Variable Labels and Value Labels 184
Preparing to Analyze Your Data 185
Checking for Nonlinearity 185
Dealing With Nonlinearities 187
Detecting and Addressing Colinearity 190
Other Data Manipulations 192
Generating New Composite Variables 193
Recoding Variables 198
The Theory-Data Danger Zone: Endogeneity, Simultaneity, and Omitted Variable Bias 200
Endogeneity and Simultaneity 201
Omitted Variable Bias 203
Nonlinear Models 204
Summary 205
Key Terms 205

Chapter 9: Writing Up Your Research 207

The Abstract 207
The Bookends 209
The Introduction 209
The Conclusion 210
The Results: Conventions of Reporting and Discussing Quantitative Analysis 210
Tables and Figures 211
Conventions of Reporting Results 211
Discussing Qualitative Evidence and Claims 217
Focus on the Evidence 217
Be Explicit About the Study's Limitations 219
Confine Your Conclusions 220
Summary 221
Key Terms 221

Part III: Post-paper Processes

Chapter 10: Practicing Peer Review 223

Writing Without Whining 223
Self-Editing 226
Strategies of Self-Editing 228
Editing for Style and Tone: Social Science Writing 231
A Note on How Much Background Is Enough 234
Practicing Peer Review 234
Peer Review in the Social Sciences 236
Procedures for Peer Review 237

Writing Your Review of Peer Research 243
Summary 244
Key Terms 244

Chapter 11: Posters, Presentations, and Publishing 245

Presentations 245
Logistics 245
Preparing Your Presentation 247
Presenting Your Paper 249
Participating as a Discussant 251
Posters 252
Logistics 253
Preparing Your Poster 253
Preparing to Present Your Poster 256
Slip 'n' Slide 257
Graphing Quantitative Results 259
Post-paper Possibilities 259
Presentation 260
Publication 263
Brief Remarks on Graduate Study in Political Science and International Relations 265
Summary 267

Glossary 269

References 281

Index 289

INDEX

Note: Figures, previews, tables, and notes are indicated by f, p, t, or n following the page number.

Abstracts, 207–208
Actors in theories, 42–43
Adjusted R^2, 192n18, 214, 214n8
Allendoerfer, M., 257
American National Elections Studies (ANES), 49
American Political Science Review (APSR), 59n5
Analysis section. *See* Data analysis section
Analytic narratives, 104, 122–124
Animation, use of, 258n14
Annotated bibliographies, 64–65
Annotations, 64–65
Annual Meetings of the American Political Science Association, 61–62
Annual Review of Political Science (ARPS), 10, 10n12, 60
APA format, 65, 65n12
APSA format, 65, 65n12
Archival research
  data archives, 145–146, 145nn7–8, 174
  replication datasets, 173, 173n11
  special collections, 152–153
ArchiveGrid, 152–153
Arndt, L., 230
Arrow diagrams, 31, 38
Articles versus books, 58, 58n3
Association journals, 59n5
Assumptions, 23–24, 42–43, 53
Asterisks, 213, 213n6
Attribution, 11, 150–151
Audits of writing process, 224

Background knowledge, 6, 218, 234
Background research, 58, 115–116
Backups, 176n17, 177, 200n22
Baseline models, 215
Battlebots, 70
Beads-on-a-string approach, 57, 57n2, 63, 70
Between-case designs, 105–106, 105n22, 112
Bias
  omitted variable bias, 164n6, 203–204
  range of cases limitations and, 13
  simultaneity bias, 201
  snowball samples, 149
  See also Selection bias
Bibliographies, 64–65, 248, 255
Bibliography-hopping, 61, 144
BibTex, 66t, 67
Bivariate relationships, 101
Blind review, 264
Bookends, 209–210
Book reviews, 61n9
Books versus articles, 58, 58n3
Boolean algebra, 107n25
Braces, 226
Brackets, 226
Brainstorming of research questions, 17p
Brilliance, 28
Bush, George H. W., 42n17
Bush, George W., 42n17

Candidate spending, 37
Captions, 211
Case control method, 105, 105n22, 124–129, 127nn14–15, 218
Cases, what constitutes, 136
Case selection
  analytic narratives, 123–124

case control method, 125–129, 125n12, 127nn14–15
cherry picking data, 96, 107
content analysis, 119–122
peer review about, 241
process tracing, 130–132
qualitative design, 112–118
qualitative versus quantitative, 95n10
quantitative design, 161–162
structured focused comparison method, 129–130
writing about, 133
Causality, 96t
Causal mechanisms, 23, 36–39, 39–40p, 45, 52
Causal process observations (CPOs), 131
Causes of effects versus effects of causes, 97
Causes versus outcomes, 7, 7n9
Certainty versus uncertainty, 77
Ceteris paribus assumption, 163
Cheating Death by PowerPoint, 258
Cherry picking data, 96, 107
Chi-squared value, 100–101, 217
CIAO (Columbia International Affairs Online), 60
Citations, 62, 62n10, 174–176
Cleveland Browns fans, 37n12
Clinton, Bill, 42n17
Coauthoring, 263
Codebooks, 172–173
Coding of data
defined, 171, 177
inter-coder reliability, 147n10, 171
quantitative design, 177–179
recoding variables, 198–200, 200p
text mining and, 147, 147nn10–11
Coefficients, 102, 102n19, 162, 212–215
Colinearity, 190–192
Collegiality, 246
Colloquialisms, 233
Color, use of, 256
Commas, 229
Comparative method. *See* Case control method
Comparative politics, domains and, 25
Composite variables, 192–200, 194–196t, 196p, 200p
Concepts, 8, 48–51
Concept webs, 71
Conclusion section
overview, 56, 210
peer review about, 242
for posters, 255
for presentations, 248
Conditional hypotheses, 88–89
Conferences, 260–263, 262n15
Confidentiality, 150–151, 172n9
Confounding variables, 203
Constants, 47–48, 113, 212, 212n4
Content analysis, 106, 118–122, 118n6, 146n9
Contractions, 233
Controlled comparison method. *See* Case control method
Control variables (CV), 112–113, 162–164, 164–165p
Conway, A., 190
Correlates of War (COW), 168–169
Correlation matrices, 190
Corresponding authors, 173, 173n12
Count analysis, 118–119
Counterexamples, 47
Counterexplanations, 47
Counterfactuals, 141–142, 218
CPOs (causal process observations), 131
Croco, S., 250
Cronbach's Alpha, 193
Cross tabulation, 100–101
Curriculum vitae, 56n1

Data, information compared, 136–137
Data analysis, quantitative
composite variables, 193–200, 194–196t, 196p, 200p
endogeneity, 201–203
missing data, 183–185
nonlinear models, 204–205
omitted variable bias, 164n6, 203–204
preparation for, 185–192, 188–189f
preservation of original data, 199–200, 199n21
recoding variables, 198–200, 200p
simultaneity, 201
transferring data to stats programs, 181–183
Data analysis section
overview, 56

qualitative design, 217–221, 220n11
quantitative design, 210–217
Data archives, 174
Data collection, qualitative
counterfactuals, 141–142
human subjects research, 148–151, 148n13
