

General

MATHEMATICS

k to 12

$k=0$ $\binom{n}{k} x^k$

$(A \text{ AND } B) = P(A) \cdot P(B)$

$E = mc^2$

$\log a^n = n \log a$

$\pi \geq$

TABLE OF CONTENTS

CHAPTER 1: FUNCTIONS AND THEIR GRAPHS

| | |
|--------------------------------------|-----|
| Lesson 1: Concepts of Functions..... | 1 |
| Lesson 2: Rational Functions..... | 26 |
| Lesson 3: Inverse Functions..... | 63 |
| Lesson 4: Exponential Functions..... | 84 |
| Lesson 5: Logarithmic Functions..... | 100 |
| Chapter Exercises..... | 177 |

CHAPTER 2: BASIC BUSINESS MATHEMATICS

| | |
|---|-----|
| Lesson 1: Simple Interest..... | 123 |
| Lesson 2: Compound Interest..... | 134 |
| Lesson 3: Simple and General Annuities..... | 142 |
| Lesson 4: Stocks and Bonds..... | 158 |
| Lesson 5: Basic Concepts of Business and Consumer Loans..... | 170 |
| Chapter Exercises..... | 187 |

CHAPTER 3: LOGIC

| | |
|--|-----|
| Lesson 1: Propositional Logic..... | 191 |
| Lesson 2: Methods of Proof and Disproof..... | 199 |
| Chapter Exercises..... | 205 |
