

A WSS Senior High School Book Series

GENERAL MATHEMATICS

for Senior High School

A Comprehensive Approach

K to 12 Curriculum Compliant

Winston S. Sirug, Ph.D.

Preface iii
 Dedication v

Chapter 1

Functions 1

Unit 1.1: Basic Concepts 3
 Unit 1.2: Basic Types of Functions 5
 Unit 1.3: Piecewise Function 8
 Unit 1.4: Algebra of Functions 10
 Unit 1.5: Composite Functions 12
 Unit Exercises 15
 Chapter 1 Review Problems 25

Chapter 2

Rational Functions 27

Unit 2.1: Basic Concepts 29
 Unit 2.2: Asymptotes of Rational Functions 30
 Unit 2.3: Graphing Rational Functions 35
 Unit 2.4: Solving Rational Equations and Inequalities 41
 Unit 2.5: Application on Rational Functions 46
 Unit Exercises 49
 Chapter 2 Review Problems 57

Chapter 3

Inverse Functions 59

Unit 3.1: One-to-One Function 61
 Unit 3.2: Inverse of a One-to-One Function 62
 Unit Exercises 65
 Chapter 3 Review Problems 73

Chapter 4

Exponential and Logarithmic Functions 75

Unit 4.1: Exponential Functions 77
 Unit 4.2: Exponential Equations and Inequalities 82
 Unit 4.3: Application on Exponential Functions 85
 Unit 4.4: Logarithmic Functions 88
 Unit 4.5: Properties of Logarithms 90
 Unit 4.6: Logarithmic Equations and Inequalities 91
 Unit 4.7: Application on Logarithmic Functions 96
 Unit Exercises 99
 Chapter 4 Review Problems 109

Chapter 5

Simple and Compound Interests 111

- Unit 5.1: Introduction on Loans and Credits 113
- Unit 5.2: Basic Concepts on Simple Interest 113
- Unit 5.3: Determining the Time Period 114
- Unit 5.4: Computing Simple Interest Problem 121
- Unit 5.5: Basic Concepts on Compound Interest 126
- Unit 5.6: Computing Compound Interest Problem 129
- Unit 5.7: Comparison between Nominal and Effective Rates 133
 - Unit Exercises 137
 - Chapter 5 Review Problems 159

Chapter 6

Simple and General Annuities 161

- Unit 6.1: Introduction 163
- Unit 6.2: Basic Concepts on Simple Annuity 163
- Unit 6.3: Computing Simple Ordinary Annuity 167
- Unit 6.4: Basic Concepts on General Annuity 172
- Unit 6.5: Computing General Annuity 174
- Unit 6.6: Basic Concepts on Deferred Annuity 178
- Unit 6.7: Computing Deferred Annuity 180
 - Unit Exercises 183
 - Chapter 6 Review Problems 195

Chapter 7

Stocks and Bonds 197

- Unit 7.1: Basic Concepts on Stocks and Bonds 199
- Unit 7.2: Dividends on Preferred and Common Stocks 200
- Unit 7.3: Stock Valuation 202
- Unit 7.4: Bond Valuation 206
 - Unit Exercises 209
 - Chapter 7 Review Problems 215

Chapter 8

Business and Consumer Loans 217

- Unit 8.1: Basic Concepts on Business and Consumer Loans 219
- Unit 8.2: Charge Account Interest 220
- Unit 8.3: Annual Percentage Rate 222
- Unit 8.4: Rule of 78 / Sum-of-the-Digits Method 223
- Unit 8.5: Amortization 225
 - Unit Exercises 229
 - Chapter 8 Review Problems 235

Chapter 9

Logic 237

- Unit 9.1: Basic Concepts 239
- Unit 9.2: Simple and Compound Propositions 240
- Unit 9.3: Operations on Propositions 240
- Unit 9.4: Truth Values of Propositions 245
- Unit 9.5: Forms of Conditional Propositions 246
- Unit 9.6: Tautology, Contradiction and Contingencies 247
- Unit 9.7: Logical Equivalence 248
- Unit 9.8: Rules of Inference 251
- Unit 9.9: Logical Fallacies 254
- Unit Exercises 257
- Chapter 9 Review Problems 268

Chapter 10

Method of Proofs 271

- Unit 10.1: Basic Concepts 273
- Unit 10.2: Different Methods of Proofs 274
- Unit 10.3: Proving Mathematical Real-life Statements 276
- Unit Exercises 283
- Chapter 10 Review Problems 290

*Mathematics - the evolution of foundation of human, and the powerful
foundation of achievements of human affairs.*
- Louis Bachelard (1864-1937)
