Acknowledgement

We, the researchers would like to extend our gratitude to those people who in one way or another made this study successful.

To our Almighty God, for his unending love and guidance to all of us from the very beginning until we finished this study.

To our parents and relatives who supported us and give us financial aspects.

To our teachers for all the encouragement and never ending support that they had given us, the time that she extended and helped a lot in making this paper possible.

To our participants, the senior high school students, during the first semester of the academic year 2019-2020, for their patience in answering the questionnaires and for their cooperation towards the accomplishment of this study.

Abstract

This study examines the group and individualized work in specialized subject among ABM students in John B. Lacson Foundation Maritime University-Molo. The main objective is to identify if there is a significant difference in group and individualized work as classified according to age, gender, section and residence.

A quantitative research design was employed in this study upon gathering and analyzing the data. For this purpose, questionnaire was distributed to 120 respondents, who are officially enrolled in grade 12 of the academic year 2019-2020.
