*Abstract*

This investigation was undertaken to determine the level of satisfaction on the school uniform. The respondents of the study were the 160 randomly selected first and second year students under BS Business Administration, BS Customs Administration, BS Information Technology and BS Tourism courses of JBLFMU - Molo. A validated researcher made questionnaire was used to gather the data needed for this study. The data gathered were subjected to descriptive statistics such as frequency, percentage and mean. The study revealed that the respondents, when taken as whole and when categorized according to sex, course, year level and monthly family income, were "satisfied" with the current school uniform.
