

Paul C. Cozby / Scott C. Bates

# Methods in Behavioral Research

Twelfth Edition

**This  
International  
Student Edition  
is for use  
outside  
the U.S.**

McGRAW-HILL INTERNATIONAL EDITION

# Methods in Behavioral Research

TWELFTH EDITION

**PAUL C. COZBY**

California State University, Fullerton

**SCOTT C. BATES**

Utah State University

# Contents

<b>Preface</b>	<b>xii</b>
<b>About the Authors</b>	<b>xix</b>

## **1 SCIENTIFIC UNDERSTANDING OF BEHAVIOR 1**

Importance of Research Methods	2
Ways of Knowing	3
Goals of Behavioral Science	8
Basic and Applied Research	12
Illustrative Article: Introduction	17
<i>Study Terms</i>	18
<i>Review Questions</i>	18
<i>Activities</i>	19
<i>Answers</i>	19

## **2 WHERE TO START 20**

Research Questions, Hypotheses, and Predictions	21
Who We Study: A Note on Terminology	22
Sources of Ideas	22
Exploring Past Research	27
Literature Reviews	38
Anatomy of a Research Article	39
<i>Study Terms</i>	41
<i>Review Questions</i>	41
<i>Activities</i>	42

## **3 ETHICS IN BEHAVIORAL RESEARCH 43**

Milgram's Obedience Experiment	44
Historical Context of Current Ethical Standards	45
APA Ethics Code	47

Assessment of Risks and Benefits	49
Informed Consent	51
The Importance of Debriefing	56
Institutional Review Boards	57
Research With Nonhuman Animal Subjects	59
Being an Ethical Researcher: The Issue of Misrepresentation	61
Conclusion: Risks and Benefits Revisited	65
Illustrative Article: Replication of Milgram	67
<i>Study Terms</i>	67
<i>Review Questions</i>	68
<i>Activities</i>	68
<i>Answers</i>	71

## **FUNDAMENTAL RESEARCH ISSUES 72**

Validity: An Introduction	73
Variables	73
Operational Definitions of Variables	74
Relationships Between Variables	76
Nonexperimental Versus Experimental Methods	81
Choosing a Method	89
Evaluating Research: Summary of the Three Validities	93
Illustrative Article: Studying Behavior	94
<i>Study Terms</i>	95
<i>Review Questions</i>	95
<i>Activities</i>	96
<i>Answers</i>	98

## **MEASUREMENT CONCEPTS 99**

Reliability of Measures	100
Construct Validity of Measures	105
Reactivity of Measures	109
Variables and Measurement Scales	110
Illustrative Article: Measurement Concepts	113
<i>Study Terms</i>	114
<i>Review Questions</i>	115
<i>Activities</i>	115

**6 OBSERVATIONAL METHODS 117**

Quantitative and Qualitative Approaches 118

Naturalistic Observation 119

Systematic Observation 123

Case Studies 125

Archival Research 126

Illustrative Article: Observational Methods 129

*Study Terms* 130*Review Questions* 130*Activities* 130*Answers* 131**7 ASKING PEOPLE ABOUT THEMSELVES:  
SURVEY RESEARCH 132**

Why Conduct Surveys? 133

Constructing Questions to Ask 135

Responses to Questions 138

Finalizing the Questionnaire 142

Administering Surveys 143

Survey Designs to Study Changes Over Time 146

Sampling From a Population 147

Sampling Techniques 149

Evaluating Samples 152

Reasons for Using Convenience Samples 155

Illustrative Article: Survey Research 157

*Study Terms* 158*Review Questions* 158*Activities* 159*Answers* 160**8 EXPERIMENTAL DESIGN 161**

Confounding and Internal Validity 162

Basic Experiments 163

Assigning Participants to Experimental Conditions 168

Independent Groups Design 168

Repeated Measures Design 169

Matched Pairs Design 174

Illustrative Article: Experimental Design	175
<i>Study Terms</i>	176
<i>Review Questions</i>	177
<i>Activities</i>	177

## 9 CONDUCTING EXPERIMENTS 179

Selecting Research Participants	180
Manipulating the Independent Variable	181
Measuring the Dependent Variable	186
Additional Controls	190
Additional Considerations	194
Analyzing and Interpreting Results	196
Communicating Research to Others	196
Illustrative Article: Conducting Experiments	197
<i>Study Terms</i>	198
<i>Review Questions</i>	199
<i>Activities</i>	199
<i>Answers</i>	200

## 10 COMPLEX EXPERIMENTAL DESIGNS 201

Increasing the Number of Levels of an Independent Variable	202
Increasing the Number of Independent Variables: Factorial Designs	204
Illustrative Article: Complex Experimental Designs	217
<i>Study Terms</i>	218
<i>Review Questions</i>	218
<i>Activities</i>	218

## 11 SINGLE-CASE, QUASI-EXPERIMENTAL, AND DEVELOPMENTAL RESEARCH 220

Single-Case Experimental Designs	221
Quasi-Experimental Designs	225
Developmental Research Designs	234
Illustrative Article: A Quasi-Experiment	238
<i>Study Terms</i>	238
<i>Review Questions</i>	239
<i>Activities</i>	239

# Index

Note: Page numbers followed by “f” and “t” indicate figures and tables respectively.

## A

- abbreviations, 341–342
- abstract, 38
  - organization of report, 321–322
  - See also research article
- accuracy of measures, reliability and, 105
- acknowledgement, writing report, 311
- active vs. passive voice, writing report, 310–316
- additional controls, 190–194
- administering surveys, 143–146
- alpha level, 270
- alternate forms reliability, 102
- alternative explanations, 10
- American Psychological Association (APA), 40, 47
- analysis of variance (*F* tests), 212, 272, 275, 381
  - one independent variable, 381–385, 384t
  - repeated measures (within subjects), 390–392, 391t, 392t
  - two independent variable, 385–390, 387t, 388t, 389t
- AND operation, 34
- animal subjects, nonhuman, 59–61
- Annual Review of Psychology*, 41

APA. See American Psychological Association (APA)

- APA Ethics Code*, 47–49, 61, 367–373
  - five principles, 47–48, 368–369
  - preamble, 367–368
  - protecting research subjects, 48–49
  - research and publication, 369–373
  - See also ethics in behavioral research
- APA style, 318
- appendix
  - organization, of report, 328
- applied research, behavior, 13–15
  - vs. basic, 15–17, 17t
- archival data, 128
- archival research, 126–128
  - statistical records, 127
  - survey archives, 127–128
  - written and mass communication records, 128
- Aristotle, 4
- assent, 53
- assignment procedures
  - factorial designs and, 213
- asterisk, search tool and, 34
- attachment theory, 25–26
- attrition, 166
- authority, 4–5
- autonomy

- Belmont Report and, 46–47
- issues, 53

## B

- balanced placebo design, 191
- bar graphs, 246–247, 247f
- baseline control period, 221
- basic experiments, 163–168, 167f
- basic research, behavior, 12–13
  - vs. applied, 15–17, 17t
- behavior
  - description of, 91–92
  - future, predictions of, 92
  - scientific understanding (See scientific understanding, behavior)
  - survey questions, 136
- behavioral measures, 187
- behavioral research
  - ethics in (See ethics in behavioral research)
  - methods, importance of, 2–3
  - risks in, 49–51
  - U.S. Supreme Court decisions and, 3
- behavioral science, goals of, 8–12
  - causes of behavior, determining, 9–10
  - description of behavior, 8–9, 9f
  - explanation of behavior, 10–12
  - prediction of behavior, 9
- Belmont Report, 46–47
  - ethical principles of, 46–47
- The Belmont Report: Ethical Principles and Guidelines for the Protection of Human Subjects of Research*, 46

- beneficence  
 APA Ethics Code, 47, 368  
 Belmont Report and, 46  
 between-group variance, 275  
 between-subjects design, 168  
 biased language, avoiding,  
 312–313  
 binomial distribution, 270  
 bivariate research, 286, 288  
 body of paper  
 organization, of report,  
 323–328  
 Brooks, David, 17  
*Brown v. Board of Education*, 3  
 Burt, Cyril, Sir, 61
- C**  
 carryover effect, 170  
 case studies, observational  
 methods, 125–126  
 CATI. *See* computer-assisted  
 telephone interview (CATI)  
 ceiling effect, 189  
 cell phone use, while driving,  
 32–33  
 central tendency, 248–249,  
 374–376  
 childhood autism, 26–27  
 chi-square, 377–380, 378t  
 effect size for, 380–381  
 citation style, 331–335  
 citing and referencing sources,  
 331, 333–341  
 clarity, writing report, 310–311  
 classical conditioning, 24  
 closed-ended questions, 138–139  
 cluster sampling, 151, 153t  
 coercion, 53  
 cohort, 236  
 cohort effects, 236  
 college students, 292–293  
 in defense of, 296–297  
 common sense idea, 23  
 communicating research, 196–197  
 computer analysis, data, 285–286  
 computer-assisted telephone  
 interview (CATI), 145  
 concealment, 121–122  
 conceptual replication, 302–303  
 conclusion, 344  
 concurrent validity, 106t, 108  
 conducting experiments  
 additional controls, 190–194  
 communicating research,  
 196–197  
 debriefing, 196  
 dependent variable, measuring,  
 186–190  
 independent variable,  
 manipulating, 181–186  
 manipulation checks, 195–196  
 pilot studies, 194–195  
 research participants, selecting,  
 180  
 research proposals, 194  
 results, analyzing and  
 interpreting, 196  
 confederate, 183  
 confidence intervals, 148  
 statistical significance and,  
 276–278, 277f  
 confidentiality, 50–51  
 confounding variable, 84, 162  
 construct validity, 73, 93  
 of measures, 105–109, 106t  
 content analysis, 128  
 content validity, 106t, 107  
 control series design, 233, 233f  
 convenience samples, 155–157  
 convergent validity, 106t,  
 108–109  
 correct decisions, 278–279  
 correlation coefficient, 79,  
 251–255  
 correlational method, 82  
 counterbalancing, 171–174, 172f  
 covariation of cause and effect, 10  
 criterion, 107  
 criterion variable, 257  
 Cronbach's alpha, 103  
 cross-sectional method, 234–235,  
 234f  
 vs. longitudinal method,  
 236–237  
 culture, 294–296  
 curvilinear relationship, 255, 255f  
 variables, 77f, 78, 79t
