

# Operations Management

Theory and Practice

B. Mahadevan

# CONTENTS

ABOUT THE AUTHOR	xix		
PREFACE	xxi		
<b>PART-I UNDERSTANDING OPERATIONS</b>			
<b>Chapter 1: Operations Management: Trends and Issues</b>	<b>3</b>		
<b>1.1 Ideas at Work Operations Management at GEMI 4</b>			
1.1 Introduction to Operations Management	5		
1.2 Current Trends in Manufacturing in India	6		
1.3 Services as a Part of Operations Management	8		
Intangibility	9		
Heterogeneity	9		
Simultaneous Production and Consumption	9		
Perishability	10		
<b>1.2 Ideas at Work Operations Management in Service Systems 11</b>			
1.4 Operations as a Key Functional Area in an Organisation	12		
1.5 Operations Management: A Systems Perspective	14		
Operations Management Functions	16		
Design versus Operational Control	16		
Issues in Operations Management			
		Long-Term versus Short-Term Issues in Operations Management	17
		1.6 Challenges Faced by Operations Management	18
		Quality Management Issues Need Greater Attention	19
		Manufacturing Companies Have Long Lead Time for Order Fulfilment	20
		Low Labour Productivity Offsets Cost Advantages	20
		1.7 Priorities for Operations Management	20
		Acquire Capabilities to Tolerate Product Proliferation	20
		Relate the Operations System to Customer/Market	21
		Develop Systems and Procedures That Promote Learning	21
		<b>1.3 Ideas at Work Challenges Faced by the White Goods Industry 21</b>	
		1.8 Organisation of the Book	22
		Summary	23
		Review Questions	24
		References	24
		<b>Chapter 2: Operations Strategy</b>	<b>25</b>
		<b>2.1 Ideas at Work Air Deccan—India's First Low Cost Airline 26</b>	
		2.1 Relevance of Operations Strategy	28

2.2 Strategy Formulation Process	29	3.6 Planning Premises and Process	76
Order-Qualifying Attributes	30	Implications	
Order-Winning Attributes	30	Make-to-Stock (MTS)	76
<b>2.2 Ideas at Work Order Winning</b>		Make-to-Order (MTO)	76
<b>and Order Qualifying Attributes 31</b>		Assemble-to-Order (ATO)	77
2.3 Measures to Ensure Operational	32	3.7 Complexity of Operations Management	78
Excellence		Summary	79
2.4 Strategic Options for Operations	35	Review Questions	79
Product Portfolio	35	References	80
Process	36	<b>Chapter 4: Product Development</b>	<b>81</b>
Technology	36	<b>Process</b>	
Capacity	37	<b>4.1 Ideas at Work Facets of New Product</b>	
Break-even Analysis	38	<b>Development Process in India 82</b>	
Supply Chain Issues	39	4.1 Role of Product Development in	82
2.5 World Class Manufacturing Practices	41	Competitiveness	
2.6 Emerging Trends and Implications for	45	4.2 Product Development Process	84
Operations		Concept Generation	84
Dismantling of Trade Barriers	45	Design	85
Outsourcing as a Major Wave	47	Development	86
Collaborative Commerce Through the	49	Production	86
Internet		4.3 Organization for Product Development	87
Summary	50	4.4 Tools for Efficient Product Development	89
Review Questions	51	Understanding Customer Needs	89
Problems	51	<b>4.2 Ideas at Work Getting Together to</b>	
References	52	<b>Know What the Customer Wants 91</b>	
<b>PART-II DESIGNING OPERATIONS</b>		Quality Function Deployment	92
<b>Chapter 3: Design of Processes</b>	<b>53</b>	Value Engineering	94
3.1 Determinants of Process Characteristics	56	Design for Manufacturability	94
in Operations		Tools for Mass Customisation	96
Volume	56	<b>4.3 Ideas at Work Variety Reduction</b>	
Variety	57	<b>Exercise—Opportunities for Cost Cutting 97</b>	
Flow	57	4.5 Performance Measures for Product	99
3.2 Types of Processes and Operations Systems	58	Development Process	
Continuous Flow System	58	4.6 Management Accounting Tools for	100
<b>3.1 Ideas at Work Polyester Filament</b>		Product Development	
<b>Yarn Plant at Reliance 60</b>		4.7 Software Product Development	102
Intermittent Flow	63	Summary	103
<b>3.2 Ideas at Work Process Redesign</b>		Review Questions	103
<b>for Improving Flow 64</b>		References	104
Jumbled Flow Systems	66	<b>Chapter 5: Total Quality Management 105</b>	
3.3 Process-Product Matrix	68	<b>5.1 Ideas at Work Poka Yoke for</b>	
3.4 Process Design Issues in Service Systems	69	<b>Defect Prevention 106</b>	
3.5 Technology Issues in Process Design	71	5.1 The Quality Revolution	107
Flexible Manufacturing Systems	71	5.2 Quality Gurus	108
Automated Material Handling Systems	74	William Edwards Deming	108
		Joseph M. Juran	109

Philip B. Crosby	110	<i>Problems</i>	135
Karou Ishikawa	110	<i>References</i>	136
Shigeo Shingo	111		
Genichi Taguchi	111		
5.3 Definitions of Quality	111	<b>Chapter 6: Statistical Process Control</b>	<b>137</b>
Conformance to Specifications	112	<b>6.1 Ideas at Work Quality Control at Indian Food Specialties Limited</b>	<b>138</b>
Fulfilling Customer Needs	112	6.1 Variations in Processes	139
Fitness for Use	112	Common Causes	139
5.4 Total Quality Management	114	Assignable Causes	141
Commitment of Top Management	114	6.2 Setting up a Process Control System	142
Employee Involvement	116	Step 1: Choose the Characteristic for Process Control	142
Addressing Training Requirements	117	Step 2: Choosing the Measurement Method	143
5.5 Quality Management Tools	117	<b>6.2 Ideas at Work What Constitutes a Defect: The Case of Fixed Deposits</b>	<b>143</b>
Tools for Highlighting Quality Problems	118	Step 3: Choose an Appropriate Sampling Procedure	145
Tools for Identifying Specific Improvement Opportunities	118	Step 4: Choosing the Type of Control Chart	145
Tools for Analysing Problems and Their Root Causes	118	Step 5: Compute Control Limits	145
Tools for Operational Planning	119	Step 6: Plot the Data and Analyse	154
Tools for Strategic Planning	119	6.3 Making Process Improvements in the Long Run	156
<b>5.2 Ideas at Work Matrix Diagram for Enhancing Competitiveness of a Product</b>	<b>125</b>	Process Capability	156
Quality Function Deployment	126	Potential Capability	157
Quality Costing	127	Actual Capability	157
5.6 Quality Certifications and Awards	127	Six-Sigma Approach to Quality	159
Quality Awards	128	6.4 Acceptance Sampling	160
Quality Certification	129	Single Sampling Plan	161
<b>5.3 Ideas at Work ISO 9000 and ISO 14000</b>	<b>130</b>	AQL and LTPD	163
5.7 Service Quality	130	<i>Summary</i>	165
5.8 Design of Quality Assurance System	132	<i>Review Questions</i>	165
Top Management Commitment	132	<i>Problems</i>	165
Employee Involvement	133	<i>References</i>	167
Establish a System to Understand What the Customers Want and to Translate Them into Meaningful Measures	133	<b>Chapter 7: Facilities Location</b>	<b>168</b>
Identify Quality Problems	133	<b>7.1 Ideas at Work Li &amp; Fung: Global Operations</b>	<b>169</b>
Tools and Techniques for Problem Solving	133	7.1 Globalisation of Operations	170
Mistake-Proofing of Operations	133	Regulatory Issues	170
Documentation for Continuous Learning and Improvement	133	Factor Advantages	171
Benchmarking	134	Expanding Markets in Developing Countries	171
<i>Summary</i>	134	7.2 Factors Affecting Location Decisions	173
<i>Review Questions</i>	134	7.3 Location Planning Methods	174
		<b>7.2 Ideas at Work Infrastructure—A Significant Factor in Location Planning</b>	<b>175</b>

Location Factor Rating	176	9.3 Time Horizon in Capacity Planning	224
Centre of Gravity Method	178	<b>9.2 Ideas at Work Nine Sources of Waste 224</b>	
Load-distance Method	180	9.4 Capacity Planning Framework	226
Transportation Model	181	Estimating Total Requirement	227
7.4 Other Issues in Location Planning	185	Estimating Labour and Machine Requirements	227
<i>Summary</i>	186	Computing Capacity Availability	229
<i>Review Questions</i>	187	Comparison of Availability and Requirement	230
<i>Problems</i>	187	Process Mapping and Capacity Analysis	231
<i>References</i>	188	9.5 Alternatives for Capacity Augmentation	233
<b>Chapter 8: Plant Layout</b>	<b>189</b>	Waste Elimination	234
<b>8.1 Ideas at Work Layout Redesign Results in Numerous Benefits 190</b>		Multi-skilling of Work Force	234
8.1 Implications of Layout Planning	191	Sub-contracting/Outsourcing	235
8.2 Types of Layouts	192	9.6 Decision Tree for Capacity Planning	236
Process Layout	193	9.7 Waiting Line Models	239
Product Layout	193	Basic Structure of a Queueing System	239
<b>8.2 Ideas at Work Process Layout—Disadvantages 195</b>		Calling Population	239
Group Technology Layout	197	Service Parameters	242
Fixed Position Layout	198	9.8 Capacity Issues in a Service Industry	247
8.3 Performance Measures for Layout Design	198	<i>Summary</i>	248
<b>8.3 Ideas at Work Workplace Organisation at Thermax 199</b>		<i>Review Questions</i>	249
8.4 Design of Process Layouts	200	<i>Problems</i>	249
Qualitative Approach to Layout Design	201	<i>References</i>	250
Quantitative Approach to Layout Design	202		
Computer Packages for Layout Design	203	<b>PART-III PLANNING AND CONTROL OF OPERATIONS</b>	
8.5 Design of Product Layouts	204		
8.6 Alternative Approaches to Layout Design	208	<b>Chapter 10: Forecasting</b>	<b>253</b>
Design of Group Technology Layout	208	<b>10.1 Ideas at Work Role of Forecasting in a Petrochemical Manufacturer 254</b>	
<b>8.4 Ideas at Work Line Balancing at MICO 209</b>		10.1 Forecasting as a Planning Tool	255
Rank Order Clustering (ROC)	211	10.2 Why do We Forecast?	256
One Worker-Multiple Machine Layouts	214	10.3 Forecasting Time Horizon	256
8.7 Layout Design for Services	215	Short-term Forecasting	257
<i>Summary</i>	215	Medium-term forecasting	257
<i>Review Questions</i>	216	Long-term forecasting	257
<i>Problems</i>	216	10.4 Design of Forecasting Systems	258
<i>References</i>	217	10.5 Developing a Forecasting Logic	258
<b>Chapter 9: Capacity Planning</b>	<b>218</b>	10.6 Sources of Data	260
<b>9.1 Ideas at Work Capacity Expansion Plans at Gujarat Ambuja 219</b>		Salesforce Estimates	260
9.1 Definition of Capacity	219	Point of Sales (POS) Data Systems	260
9.2 Measures of Capacity	221	Forecasts from Supply Chain Partners	260
		Trade/Industry Association Journals	260
		B2B Portals/Market Places	261

Economic Surveys and Indicators	261	11.6 Alternatives for Managing Supply	294
Subjective Knowledge	261	Inventory-Based Alternatives	294
10.7 Models for Forecasting	261	Capacity-Adjustment Alternatives	295
<b>10.2 Ideas at Work Role of Internet in Forecasting 262</b>		11.7 Two Basic Strategies for Aggregate Production Planning	297
10.8 Extrapolative Methods for Forecasting	263	Level Strategy	297
Using Time Series		Chase Strategy	298
Moving Averages	263	Mixed Strategy	298
Exponential Smoothing Method	264	11.8 Aggregate Production Planning Methods	309
Extracting the Components of Time Series	265	Heuristic Methods for APP	309
Estimating Trend Using Linear Regression	268	<b>11.2 Ideas at Work Use of Spreadsheet for Aggregate Production Planning 311</b>	
Extracting the Seasonal Component	270	Optimal Methods for APP	311
10.9 Causal Methods of Forecasting	271	11.9 OR Tools for Production Planning	312
Econometric Models	272	Aggregate Production Planning Using Transportation Model	312
<b>10.3 Ideas at Work Factors Affecting Fertiliser Use in Punjab 273</b>		Linear Programming Model for APP	315
10.10 Accuracy of Forecasts	274	The Linear Decision Rule (LDR)	316
Forecast Error (FE)	274	11.10 Master Production Scheduling	317
Mean Absolute Deviation (MAD)	275	<i>Summary</i>	319
Mean Absolute Percentage Error (MAPE)	275	<i>Review Questions</i>	320
Mean Squared Error (MSE)	275	<i>Problems</i>	320
Tracking Signal (TS)	275	<i>References</i>	322
10.11 Using the Forecasting System	278	<b>Chapter 12: Resources Planning 323</b>	
Getting Started	278	<b>12.1 Ideas at Work ERP Implementation at Avon Cycles 324</b>	
Focus Forecasting	279	12.1 Dependent Demand Attributes	325
Incorporating External Information	279	12.2 Planning Framework—Basic Building Blocks	326
Stability versus Responsiveness of Forecasting Systems	280	Multiple Levels in Products	327
<i>Summary</i>	281	Product Structure	328
<i>Review Questions</i>	281	Bill of Materials (BOM)	330
<i>Problems</i>	282	Time Phasing the Requirement	332
<i>References</i>	285	Determining the Lot Size	333
<b>Chapter 11: Aggregate Production Planning 286</b>		Incorporating Lead Time Information	335
<b>11.1 Ideas at Work Production Planning at CTI Inc. 287</b>		Establishing the Planning Premises	336
11.1 Planning Hierarchies in Operations	288	12.3 Material Requirements Planning (MRP) Logic	338
11.2 Aggregate Production Planning	290	12.4 Using the MRP system	342
11.3 Why is Aggregate Production Planning Necessary?	291	Updating MRP Schedules	343
11.4 A Framework for Aggregate Production Planning	292	Safety Stock and Safety Lead Time	343
11.5 Alternatives for Managing Demand	293	12.5 Capacity Requirements Planning (CRP)	345
Reservation of Capacity	293	12.6 Distribution Requirement Planning (DRP)	347
Influencing Demand	293	12.7 Manufacturing Resources Planning (MRP-II)	348
		12.8 Enterprise Resources Planning (ERP)	348
		12.9 Resources Planning in Services	350

12.2 Ideas at Work Ramco Enterprise Discrete Manufacturing (Ramco EDM)	351	14.6 Scheduling of Job Shops	392
Summary	352	14.7 Input-Output Control	395
Review Questions	352	14.8 Operational Control Issues in Mass Production Systems	396
Problems	353	14.9 Planning and Control of Operations Based on Theory of Constraints	397
References	356	Analogy of Marching Soldiers	398
<b>Chapter 13: Just-in-time Manufacturing</b>	<b>357</b>	Synchronous Manufacturing	399
13.1 Ideas at Work Lucas TVS: The JIT Grand Prix Winner	358	Constraints in a Manufacturing System	399
13.1 Origins of JIT	359	Drum-Buffer-Rope (DBR) Methodology	400
13.2 Core Logic of JIT	360	Summary	401
13.3 Elements of JIT Manufacturing	362	Review Questions	401
Manufacturing Architectural Changes	362	Problems	402
Lot Size Reduction	364	References	403
Kanban as Control Tool	365	<b>Chapter 15: Project Management</b>	<b>405</b>
13.2 Ideas at Work Setup Time Reduction in Brakes India	366	15.1 Ideas at Work Establishing a Satellite Tracking and Telemetry Station	406
13.4 Production Planning and Control in JIT	367	15.1 Characteristics of Project Organisations	407
Push and Pull Scheduling	367	Different from Mainstream	407
The Kanban System	369	No Expertise Currently Available	407
Design of Kanban Quantities	371	Product or Service Offered is Large Scale	408
13.3 Ideas at Work What Are the Experiences of JIT Implementers so Far?	374	High Degree of Customisation	408
13.5 JIT Implementation Issues	374	15.2 Project Management—Four Phases	409
Summary	375	15.3 A Framework for Project Management	411
Review Questions	376	Work Breakdown Structure	411
Problems	376	Organisation Breakdown Structure	413
References	377	Cost Breakdown Structure	413
<b>Chapter 14: Scheduling of Operations</b>	<b>378</b>	15.4 Tools and Techniques for Project Management	414
14.1 Ideas at Work Preactor APS: Software for Scheduling of Operations	379	Developing a Network Representation of a Project	414
14.1 Need and Basis for Scheduling	380	Analysis of Project Networks	418
14.2 Scheduling—Alternative Terminologies	381	15.5 Addressing Time and Resource Constraints	420
Planning-related Terms	381	Resource Levelling	421
Technological Constraints-related Terms	382	Developing Alternative Schedule	422
Administration-related Terms	382	Time-Cost Trade-offs in Projects	424
14.3 Loading of Machines	382	15.6 Handling Uncertainty in Project Completion	427
14.4 Scheduling Context	384	Probability of Completion	430
Scheduling Rules	386	Simulation of Project Networks	431
Performance Criterion	387	Summary	431
14.5 Scheduling of Flow Shops	389	Review Questions	432
Johnson's Rule	390	Problems	432
Gantt Charts for the Schedule	392	References	434

## PART-IV OPERATIONS AND THE VALUE CHAIN

## Chapter 17: Purchasing and Supply Management 464

<b>Chapter 16: Supply Chain Management</b>	<b>437</b>	<b>17.1 Ideas at Work Role of Internet in Purchasing and Supply Management</b>	<b>465</b>
<b>16.1 Ideas at Work Mother Dairy: A Case for Supply Chain Management?</b>	<b>438</b>	17.1 Importance of Purchasing and Supply Management	466
16.1 What is a Supply Chain?	439	17.2 The Procurement Process	468
Need for a Good Supply Chain Management	440	17.3 Approaches to Supply Management	471
Information and Material Flows in the Supply Chain	441	<b>17.2 Ideas at Work Hidden Costs of Traditional Supply Management Practices</b>	<b>472</b>
16.2 Components of Supply Chain	442	<b>17.3 Ideas at Work Trusting Suppliers?</b>	<b>474</b>
In-bound Supply Chain	442	17.4 Developing Reliable Vendors	475
In-house Supply Chain	443	Supplier Development	475
Out-bound Supply Chain	444	Supplier Certification Programmes	476
Distribution Network Design	445	Vendor Rating	477
Logistics Management	446	17.5 Measures for Purchasing and Supply Chain Management	479
Channel Management	447	<b>17.4 Ideas at Work Total Cost of Ownership in an Automobile Component Manufacturing Unit</b>	<b>480</b>
<b>16.2 Ideas at Work Project Pragati at Ceat</b>	<b>447</b>	17.6 Make or Buy Decision	481
16.3 Supply Chain Management: A Process Orientation	448	Cost	482
Planning for Operations	448	Core versus Non-core Activities	482
16.4 Supply Chain Structure	449	Managing Capacity Expansion	482
Number of Layers	450	Strategic Restructuring	482
Delays in the Chain	450	17.7 E-Procurement	483
Decision Making Patterns	450	Collaborative Market Mechanisms	484
Independence of Each Member of the Supply Chain	450	Quasi-market Mechanisms	484
16.5 Bullwhip Effect in Supply Chains	450	Neutral Market Mechanisms	484
16.6 Measures for Supply Chain Performance	451	<i>Summary</i>	486
Post-process Indices	452	<i>Review Questions</i>	486
<b>16.3 Ideas at Work Supply Chain Operations Reference (SCOR) Model</b>	<b>455</b>	<i>References</i>	486
Process Indices	455	<b>Chapter 18: Inventory Planning and Control</b>	<b>488</b>
16.7 Design of Supply Chains	458	<b>18.1 Ideas at Work Importance of Inventory Management</b>	<b>489</b>
Designing Efficient Supply Chains	458	18.1 Inventory Planning for Independent Demand Items	490
Designing Responsive Supply Chains	459	Timing of Demand	490
16.8 Third Party Logistics in Internet Firms	459	Uncertainty of Demand	490
16.9 Role of IT in Supply Chain Management	460	18.2 Types of Inventory	491
<b>16.4 Ideas at Work Global Supply Chain Management: The Case of Li &amp; Fung</b>	<b>461</b>	Seasonal Inventory	491
<i>Summary</i>	462	Decoupling Inventory	491
<i>Review Questions</i>	462	Cyclic Inventory	491
<i>References</i>	463	Pipeline Inventory	492

18.3 Inventory Costs	493	Maintenance Policy/Manual	531
Inventory Carrying Cost	494	Troubleshooting Mechanisms	531
Cost of Ordering	495	Fault Tree Analysis	531
Cost of Shortages	496	Maintenance Information System	531
18.4 Inventory Control for Deterministic Demand Items	497	<b>19.2 Ideas at Work Troubleshooting Mechanisms for Effective Maintenance 532</b>	
18.5 Handling Uncertainty in Demand	500	19.5 Maintenance Alternatives	533
18.6 Inventory Control Systems	503	Inspection (Routine)	533
Continuous Review (Q) System	503	Preventive Maintenance (PM)	534
The Periodic Review (P) System	504	Predictive Maintenance (Condition Monitoring)	534
Issues in Using P and Q Systems of Inventory Control	505	Breakdown Maintenance (BD)	534
18.7 Selective Control of Inventories	508	Planned Shutdowns/Major Overhauls	535
ABC Classification	508	Equipment Replacement	535
Other Classification Schemes for Selective Control	510	19.6 Decision Tools for Maintenance Management	536
18.8 Inventory Planning for Single Period Demand	511	Optimal Preventive Maintenance Policy	536
<b>18.2 Ideas at Work Inventory Control System in a Petrochemical Manufacturer 511</b>		Group Replacement Policies	540
18.9 Other issues in Inventory Planning and Control	513	Equipment Replacement Decisions	540
<i>Summary</i>	514	19.7 Spare Parts Management	542
<i>Review Questions</i>	514	Types of Spares	542
<i>Problems</i>	515	Inventory Planning for Spare Parts	543
<i>References</i>	517	19.8 Total Productive Maintenance	545
		Overall Equipment Effectiveness	546
		TPM Methodology	547
		TPM Implementation	548
		<i>Summary</i>	549
		<i>Review Questions</i>	550
		<i>Problems</i>	550
