Abstract

This investigation was undertaken to determine the perceived level of usage of cellular phones among ABM students of JBLFMU-Molo, Inc. A face validated researcher-made questionnaire was used to gather data needed for this study. The data gathered were subjected to descriptive statistics such as Mean and Description. The study that cellular phones are always used to the ABM students of JBLFMU-Molo, Inc., regardless to their variables. Forty responses to questions regarding their instructor teaching behaviours, their experience of boredom in class, and their attitude towards using cellular phones for task activities. Results indicated that, after controlling for students' general cellular phone involvement and course policies regarding cellular phones in class, students' decision to engage with their cellular phones during course lessons were influenced by their attitudes toward using these devices.
