ABSTRACT

This study documented the perception on Air-conditioned classrooms related to their reaction and agreement. This study design used is descriptive by the aid of researcher made questionnaire. Data was collected through survey. This study focuses on the reaction of every student who is capable of having an Air-conditioned classroom. The data gathered obtained from 110 respondents. The result describe that the respondents agreed that temperature affects their performance. Those experiences served as milestone to improve concentration and comforts in the way of life.

Key words: students, teachers, and administration.
