## **Abstract**

The study aimed to ascertain the effects of romantic relationship on senior high school students and in their academic performance. This study was conducted from February to March 2018, and utilized 30 senior high school students of John B. Lacson Foundation Maritime University (Molo) Inc. who were involved in a romantic relationship as respondents. The simple purposive sampling method was employed. This phenomenology qualitative research utilized a self-administrative questionnaire using research method survey. A triangulation method approach was used in the study where the researchers are free to gather and analyze data using multiple methods allowing them to combine research approaches, research types, data gathering and data analysis techniques. The researchers triangulated the gathered data and crafted the findings, conclusions and recommendations. The results revealed that the romantic relationship of senior high school students, both male and female serves as an inspiration. Remarkably, it helps them develop maturity, become a better person, guarantees companion and it leads them to know their limitations and priorities. However, from time to time, it also causes them to be unfocused and takes up their time for school works. In conclusion, senior high school students are engaged in healthy romantic relationship because despite of encountering negative impacts they still view their romantic relationship as a benefit in their academics and enhances their personality as a whole.

## **ACKNOWLEDGEMENT**

The researchers would like to express their heartfelt gratitude to the following people who selflessly shared their precious time and effort towards the completion of this study:

To Dr. Elvira Delgado, research adviser, for the untroubled support, patience, encouragement, and valuable insights necessary to make this study a success;

To the Respondents, for participating in this study and for their time and effort in answering the questionnaire sincerely;

To our friends, classmates and those whom the researchers failed to mention, for the concern, love, and memories shared; and

The almighty God, the Master and the Creator of All, who gave the strength and wisdom to finish this research.

**The Researchers**
