TABLE OF CONTENTS

Introduction	iii
Unit 1. SCIENCE, TECHNOLOGY AND SOCIETY FROM A CRITICAL HISTORICAL PERSPECTIVE	1
<i>Chapter 1.</i> Social Forces and How They Impinge on the Work Scientists as Social Entities	2
<i>Chapter 2.</i> Theories and Concepts of Science and Technology	7
Why Study Science and Technology Vis-a-vis Society?	9
<i>Chapter 3.</i> Nature of Science and Technology	19
Science Vis-a-vis Other Forms of Knowing	19
The Scientific Method	21
<i>Chapter 4.</i> Science as a Social Product	27
The Political Economy for the Production of Science and Technology	27
The "Production" of the Scientist	28
The "Production" of Scientific Knowledge and Technology	30
<i>Chapter 5.</i> The Scientific Work Ethic	35
The Case of the Social Sciences	37
<i>Chapter 6.</i> Historical Perspectives on the Interactions of Science, Technology and Society	43
Significant Events in the History of Science and Technology	43
Scientific and Technological Knowledge	43
Technological Inventions and Discoveries	56
Approaches to the Study of the History of Science	71
Theories on the Nature of the Development of Scientific Knowledge	72

Unit 2. THE SOCIAL DIMENSIONS OF SCIENCE AND TECHNOLOGY	81
<i>Chapter 7. Science, Technology and the Development Process.....</i>	82
The Development Process	82
Theories of Social and Technical Change.....	83
<i>Chapter 8. Social, Political and Economic Development Vis-a-vis the Development of Science and Technology.....</i>	89
Science, Technology and Modernization.....	89
Science, Technology and State-building.....	91
Science, Technology and Capitalism.....	93
Science, Technology and Globalization.....	95
<i>Chapter 9. Science, Technology and the Power Relations in Society</i>	101
Power Relations in Society	101
Science, Technology and Class Relations.....	105
Science, Technology and Gender Relations	108
Science, Technology and Cultural Relations.....	110
<i>Chapter 10. Science, Ethics and Ecology</i>	121
The Ethics of Science	121
Ethical Implications of Scientific Knowledge...	122
Environmental Ethics and Scientific Knowledge	124
Unit 3. CRITICAL ANALYSIS OF THE INTERRELATIONSHIPS BETWEEN SCIENCE, TECHNOLOGY AND SOCIETY	131
<i>Chapter 11. Framework for Critical Analysis of Science and Technology.....</i>	132
Critical Social Theory	132
The Ideology of Science and Technology.....	136
Alternative Frameworks for Analyzing the Relationships Between Technology and Society.....	138

Chapter 12. Approaches to Technology Impact Assessment	143
Stakeholder Analysis.....	143
Technology Impact Profiling.....	145
Technology Access and Control Profile.....	145
Technology-Related Decision-Making Profile.....	146
Technology Benefit and Burden Profile.....	147
Technology Environmental Impact Assessment.....	148
Technology Social Impact Assessment.....	150
Benefit-Cost Analysis.....	150
Class Analysis.....	151
Gender Analysis.....	152
Cultural Analysis.....	153

Unit 4. SCIENCE, TECHNOLOGY AND GOVERNANCE..... 157

Chapter 13. Issues, Dynamics and Challenges of Science Governance	158
Science-governance Connections	160
Limitations and Prospects for Science-based Governance.....	161
Challenges for Global Science Governance	162
Role of Epistemic Communities	168
The Role of Science in Regional Governance: The Case of ASEAN Environments	169
Chapter 14. Science Policy and Institutions in the Philippines	183
National Science Policy.....	183
Institutional Framework for Science and Technology.....	184
Bibliography	199
